LEARN HOW TO CLEAN A TAP

Clean Taps with a little soap and moist cloth only, then simply rinse off and wipe dry. You can avoid lime spots (White Spots) by drying the fitting each time it is used. After drying you can apply a coat of wax polish to protect the surface from settlement of water for a considerable period of time.

To clean the aerator first open the housing by unscrewing it anti-clock wise, take out the aerator.

Wash it with water, clean it and simply attach it again. Here you go steady high flow of water.
